Education

University of North Carolina at Chapel Hill – 3.8/4.0 (Highest Distinction) **Chapel Hill, NC**
Computer Science B.S. & Statistics and Analytics B.S. **Dec 2021**

Related Coursework

Data Structures & Algorithms, File Systems and Databases, Internet Services and Protocols, Methods of Data Analysis, Intro to Data Science, Optimization & Linear Programming

Skills

Programming

Java · JavaScript · C/C++ · Python · C#

Web/Media

HTML/CSS · MongoDB · Express · React/React Native · Node · Photoshop

Platforms

Linux · OSX · Cloud Computing · Amazon Web Services (AWS) Certified

Work Experience

Software Engineer (Intern) – Microsoft Azure

May '21 – Aug '21

- Automation using **.NET** framework
- Deployment using **Azure Pipelines** and **Azure DevOps**
- Active member of the scrum team (**AGILE** Development)

Software Engineer (Intern) – Fidelity Investments

June '20 – Aug '20

- Alert development using **Java Spring** framework
- Server migration using **Jenkins** and **IBM UrbanCode Deploy**

Sensei – Code Ninjas

May '19 – Sept '19

- Taught kids **JavaScript** and Scratch through development of videogames
- Helped design and debug **JavaScript** games to be used in the curriculum

Projects

Hercules

MongoDB · HTML/CSS/JavaScript

Utilized the MERN (**MongoDB, Express, React/Redux/React-Native, Node**) stack to design a server to access a database and create a front-end portal to search, update, and delete data from the backend.

Chargeo

JavaScript · Express

Designed a backend server with **RESTful** API that utilized the **SmartCar API** and Google Maps route data. The frontend Mobile App sent **HTTP** requests to our API to fetch and display the map to the nearest gas station.

Activities

Technology Stacks Medium Publication

A Medium publication that explains software stacks and breaks them down into easily digestible pieces. I used **Hercules** as an example project to show what can be done with the MERN (**MongoDB, Express, React/Redux/React-Native, Node**) stack.

HackDuke 2019 (Winner of Best SmartCar API Hack)

24 Hour hackathon at Duke University, where I had the opportunity to work as a team to create **Chargeo**, an app that automatically adds charging stations to your current route when your smart car is projected to be low on battery.

UNC-Chapel Hill eSports – Treasurer

- Tracking, managing, and raising funds for new events and giveaways
- Planning fundraisers and events for the community
